

ENERQOS France SAS celebrates its 1st year in France by announcing the new SUN4PARK

To mark the first anniversary of its presence in France, Enerqos France SAS launches its new turnkey photovoltaic car park solution: the SUN4PARK™.

Paris, 22nd October 2009 – Since its arrival on the French market in 2008, Enerqos France SAS, a subsidiary of the leading Italian photovoltaic group, Enerqos, has been constantly seeking increasingly profitable and innovative energy solutions in order to satisfy the needs of its clients. Consequently, the company has created an innovative new product for public and private investors: a **foundationless modular solar canopy for car parks, the SUN4PARK™**.

An ingenious and easy to assemble modular system

Designed in partnership with the architecture agency ART'UR and the design office BET3B, the SUN4PARK™ is a very simple to assemble photovoltaic solution that is intended guarantee optimal productivity. The product's moulded, pre-built concrete base circumvents the need for

foundations; the modules can be connected together like "Lego". Moreover, thanks to the group's partnerships, Enerqos France has extremely high quality, environmentally friendly, photovoltaic components that guarantee efficiency and high energy outputs.

This new patented solution is a big first for the French market, combining simplicity and efficiency.

Inject energy into your car parks with SUN4PARK!

The SUN4PARK™ is the ideal solution for all types of car parks, those belonging to private individuals, businesses or communities. It can be tailored to any type of car park with a minimum amount of adjustment.

Easy to install and customisable, it can be seamlessly integrated into any architectural design. The concrete bases, for example can be dyed in bulk, can undergo surface treatment and can accommodate for company logos.

Finally, thanks to its photovoltaic technology, it also allows entrepreneurs to benefit from tax incentives and receive regular revenue from EDF over a 20 year period; all for environmental benefit. Marc Vogeisen, General Business Operations Director, declared: *"This photovoltaic solar canopy solution will make numerous public and private car parks, more attractive as it can be adapted to different car park layouts and the particular aesthetic preferences of our clients."*

In view of the recent changes to French legislation and the Enerqos Group's vast experience in the conception, installation and maintenance of photovoltaic systems, Enerqos France intends to develop its offering on a national level.

About ENERQOS

Enerqos is one of Italy's largest turnkey suppliers of solar systems and plants. Its headquarters are located in Monza (MI) and the company has offices in Rome, Navacchio (Pisa), subsidiaries in France and Greece. The company was created three years ago by a group of managers with relevant international experience, and has succeeded in establishing itself as a key player in the solar parks and PV systems industry in Europe. Recently, CC Capital, a private equity fund specialised in renewable energies and energy efficiency, invested €10M in the company.
